

The Queensland Laser Association Inc. is the organising body for Laser, Laser Radial and Laser 4.7 sailors in the state of Queensland, Australia. Based in Brisbane, the association represents the interests of members from all over the state and is the local representative of the International Laser Class Association (ILCA). The association organises regattas, annual championships, distributes news and information regarding the Laser and organises training for its members among other functions.

LASER DINGHIES

Perfect for Youth
Perfect for Adults

Pure sailing

Lots of Lasers means strong competition in local, National and International regattas that cater for Juniors, Youth, Men & Women and Master Sailors.

The Laser can take you from learning to sail all the way to the Olympics.

Let the Queensland Laser Association help you get a fleet of Lasers at your club with Try Laser Days and coaching Clinics.

WHY CHOOSE A LASER FOR YOUR CLUB

The Laser is one of the most popular single-handed dinghies in the world - There are more than 200,000 boats worldwide! One of the reasons the Laser is so popular is the boat's sheer simplicity. The two-part free-standing mast and sleeved sail make the boat easy to rig. It is Low cost and durable which means it is ideal for club boats. Lasers fill the entire age and ability spectrum for club's and their members.

The Laser combines one hull with three different rigs: Standard, Radial and 4.7. Young sailors starting out in the 4.7 can move up in rig sizes as they grow physically and develop tactically without the need to buy a complete new boat every few years. The one-design protection also means that the Laser will never be outdated. It really is a great boat for clubs!

GET MASTERS BACK ON THE WATER:

There's nothing like a bit of friendly competition to want you to dust off the cobwebs of your old laser or want to get back to doing something for yourself. Master's sailing starts at age 35 and, just to keep the playing field as level as possible, further divides into age divisions gives plenty of scope for fun. There are plenty of Masters friendly regattas to encourage mature sailors to return to the sport.

GET YOUTH ONTO THE WATER:

A good healthy youth division in your club not only brings benefits right now (family and friends), but benefits in the future when they bring their own families back to sailing. The Laser is a great boat for teens to learn on and some good club racing will see them progress quickly into representing your club at regattas throughout the State.
